

JANUARY 12-16TH

MS. JULIE- MARINE BIOLOGY

HONORS ACADEMY OF LITERATURE

Next Generation Science Standards

- I can explain how structure/behaviors affect growth of plants/ animals.
- I can explain how environmental and genetic factors influence organisms.
- I can provide evidence for the effects of resources in an ecosystem.

Objectives and Validation

Objectives:

- Scholars will be able to explain how structure/behavior can affect the growth of plants/animals.
- Scholars will be able to explain how environmental and genetic factors influence organisms.
- Scholars will be able to provide evidence for the effects of resources in an ecosystem and how they are interdependent.

In-class Assignments

Homework Assignments

- **No Homework**

Comments

- **This quarter we will be learning about Marine and Aquatic Biology. We will be learning about ecosystems, dissecting aquatic animals and will hatching trout eggs in our classroom.**

Mini-Lesson Topics

We will be discussing what marine/aquatic biology is.

Discussing and learning how aquatic ecosystems are different than those on land and how different factors can affect the growth of living things.

We will be watching an ocean documentary about the various aspects of marine life.
